

2-7 February 2022, Bozen-Bolzano, Italy

# Proceedings of the Twelfth Congress of the European Society for Research in Mathematics Education

**Editors:** Jeremy Hodgen, Eirini Geraniou, Giorgio Bolondi, Federica Ferretti

**Organised by:** Free University of Bozen-Bolzano

**Year:** 2022

## **Editors**

Jeremy Hodgen and Eirini Geraniou

IOE, UCL's Faculty of Education and Society, University College London, UK

Giorgio Bolondi and Federica Ferretti

Faculty of Education, Free University of Bozen-Bolzano, Italy

## **Editorial Board**

Mario Sánchez Aguilar; Linda Marie Ahl; Chiara Andrà; Jonas Bergman Ärlebäck; Fatma Aslan-Tutak; Michal Ayalon; Anna Baccaglini-Frank; Anette Bagger; Berta Barquero; Angelika Bikner-Ahsbahi; Irene Biza; Laura Black; Nina Bohlmann; Hilda Borko; Gülay Bozkurt; Lina Brunheira; Orly Buchbinder; Gözde Kaplan Can; Martin Carlsen; Susana Carreira; Renata Carvalho; Clelia Cascella; Aurélie Chesnais; Maria Chimoni; Renaud Chorlay; Anna Chronaki; Alison Clark-Wilson; Alf Coles; Jenny Christine Cramer; Annalisa Cusi; Nelleke Den Braber; Javier Díez-Palomar; Paul Drijvers; Viviane Durand-Guerrier; Andreas Ebbelind; Kirstin Erath; Nataly Essonnier; Eleonora Faggiano; Fiona Faulkner; Janne Fauskanger; Carla Finesilver; Ignasi Florensa; Birte Friedrich-Pöhler; Marita Eva Friesen; Daniel Frischemeier; Michael Gaidoschik; Ingólfur Gíslason; Inés M<sup>a</sup> Gómez-Chacón; Orlando Rafael Gonzalez; Alejandro González-Martín; Gilbert Greefrath; Rikke Maagaard Gregersen; Helena Grundén; Ghislaine Gueudet; Tanja Hamann; Çiğdem Haser; Tracy Helliwell; Dave Hewitt; Kees Hoogland; Mark Hoover; Veronika Hubeňáková; Paola Iannone; Jenni Ingram; Britta Eyrih Jessen; Heather Johnson; Seçil Yemen Karpuzcu; Ronnie Karsenty; Sibel Kazak; Beth Kelly; Cecilia Kilhamn; Boris Koichu; Ulrich Kortenkamp; Jenneke Krüger; Macarena Larrain; Aisling Leavy; Nicolas Leon; Esther Levenson; Peter Liljedahl; Andrea Maffia; Božena Maj-Tatsis; Francesca Martignone; Michela Maschietto; Janka Medova; Siún Nic Mhuiri; Morten Misfeldt; Simon Modeste; Miguel Montes; Hana Moraova; Francesca Morselli; Reidar Mosvold; Andreas Moutsios-Rentzos; Edyta Nowinska; Kate O'Brien; Antonio M. Oller-Marcén; Shai Olsher; Alik Palatnik; Chrysi Papadaki; Caterina Primi; Luis Radford; Maryna Rafalska; Chris Rasmussen; Elisabeth Rathgeb-Schnierer; David A. Reid; Jorunn Reinhardtsen; Sebastian Rezat; Miguel Ribeiro; Ornella Robutti; Helena Roos; Bettina Rösken-Winter; Sabrina Bobsin Salazar; Libuse Samkova; Piers Saunders; Judy Sayers; Florian Schacht; Petra Scherer; Stanislaw Schukajilow; Abdel Seidouvy; Anna Shvarts; Nathalie Sinclair; Michele Stephan; Pernille Bødtker Sunde; Osama Swidan; Michal Tabach; Athina Thoma; Daniel Thurm; Melih Turgut; Marianna Tzekaki; Behiye Ubuz; Beatrice Vargas; Michiel Veldhuis; Olov Viirman; Hanna Viitala; Katrin Vorhölter; Christof Weber; Mei Yang; Stefan Zehetmeier.

# TABLE OF CONTENTS

|   |    |
|---|----|
| Preface: CERME 12 in virtual Bolzano<br><i>Carl Winsløw</i>   | 1  |
| <br>  |    |
| Introduction  |    |
| Introduction to the Proceedings of the Twelfth Congress of the European Society for Research in Mathematics Education (CERME12)<br><i>Jeremy Hodgen, Eirini Geraniou, Giorgio Bolondi and Federica Ferretti</i> | 3  |
| <br>  |    |
| Plenary lectures  |    |
| Enhancing language for developing conceptual understanding: A research journey connecting different research approaches<br><i>Susanne Prediger</i>  | 8  |
| Conceptualizing individual-context relationships in teaching: Developments in research on teachers' knowledge, beliefs and identity<br><i>Jeppe Skott</i>   | 34 |
| <br>  |    |
| Plenary panel discussions   |    |
| Big Questions in Mathematics Education: A Panel Discussion<br><i>Eirini Geraniou, Michiel Veldhuis</i>  | 61 |
| Big Questions in Mathematics Education: A "Representations in Mathematics Teaching and Learning" Perspective<br><i>Anna Baccaglioni-Frank</i>   | 62 |
| Big Questions for Research on Digital Technology in Mathematics Education<br><i>Ingi Heinesen Højsted</i>   | 65 |
| Algorithms in mathematics education<br><i>Janka Medová</i>  | 69 |

|   |     |
|---|-----|
| Introduction to Thematic Working Group 1: Argumentation and Proof<br><i>Andreas Moutsios-Rentzos, Orly Buchbinder, Jenny Cramer, Paul Christian Dawkins, Viviane Durand-Guerrier, David A. Reid and Mei Yang</i>              | 72  |
| Questioning the Exclusivity of Classical Logic and Set-Theoretic Assumptions in Analysis of Classroom Argumentation and Proof<br><i>Miglena Asenova</i>   | 77  |
| Framing students' difficulties with the concept of proof, with reference to Vergnaud's Conceptual Fields Theory<br><i>Nadia Azrou</i>   | 85  |
| How preservice teachers enact mathematical argumentation and proof in class – an activity-theoretical perspective obstacles in the evolution of the concept of proof in the path of<br><i>Thomas Bauer, Eva Müller-Hill</i>   | 93  |
| Developing students' rationality by constructing and exercising rational mathematical templates: The case of counter-examples calculus classrooms<br><i>Paolo Boero</i>   | 101 |
| Continuity and rupture between argumentation and proof in historical texts and physics textbooks on parabolic motion<br><i>Laura Branchetti, Alessia Cattabriga, Olivia Levrini, Sara Satanassi</i>                           | 109 |
| How teachers address process-product dualities in mathematical argumentation processes<br><i>Fiene Bredow and Christine Knipping</i>  | 117 |
| Guiding principles for teaching mathematics via reasoning and proving<br><i>Orly Buchbinder and Sharon McCrone</i>  | 125 |
| Toulmin and beyond: structuring and analyzing argumentation<br><i>Jenny Cramer and Leander Kempen</i>   | 133 |
| The role of unitizing predicates in the construction of logic<br><i>Paul Christian Dawkins and Kyeong Hah Roh</i>   | 141 |
| Two Primary School Teachers' Mathematical Knowledge of Content, Students, and Teaching Practices relevant to Lakatos-style. Investigation of Proof Tasks<br><i>Dimitrios Deslis, Andreas J. Stylianides and Mateja Jamnik</i> | 151 |

|   |     |
|---|-----|
| A sixth-grade student's growth in understanding written proof texts: Pre- and post-interview analyses of a teaching experiment study      | 159 |
| <i>Merve Dilberoğlu, Erdiñ Çakırođlu and Çiđdem Haser</i>   |     |
| On the didactical relationship between truth and proof: Bolzano, Cauchy and the intermediate value theorem                                | 167 |
| <i>Viviane Durand-Guerrier</i>  |     |
| The Logical inferences in the view of first-year students   | 175 |
| <i>Christian Fahse</i>  |     |
| Standardized tests and the development of argumentation competency: Tensions perceived by Chilean mathematics teachers                    | 177 |
| <i>Manuel Goizueta, Constanza Ledermann and Helena Montenegro</i>   |     |
| Language activities related to logical structures of proofs – a theoretical and empirical specification                                   | 185 |
| <i>Kerstin Hein</i>   |     |
| Seventh-grade students' perceptions of qualities in a mathematical argument   | 193 |
| <i>Sigrid Iversen</i>   |     |
| Mathematical reasoning outside the classroom – A case study with primary school students solving math trail tasks                         | 201 |
| <i>Simone Jablonski</i>   |     |
| The use of a deductive reasoning when solving a word problem  | 209 |
| <i>Ieva Kiliene and Rimasi Norvaiša</i>   |     |
| Mathematical reasoning at the age of four   | 217 |
| <i>Ieva Kiliene</i>   |     |
| Procedures in proof construction: five proving strategies of first-year university students   | 219 |
| <i>Katharina Kirsten</i>  |     |
| Capitalizing on interdiscursivity to support primary school students to bridge the empirical-deductive gap: The case of parity of numbers | 227 |
| <i>Jo Knox and Igor' Kontorovich</i>  |     |
| Building up Professional Knowledge on Fostering Primary Students' Data-based Argumentation – an Intervention Study                        | 235 |
| <i>Jens Krummenauer and Sebastian Kuntze</i>  |     |

|  |     |
|--|-----|
| Children’s norms of explanations in explanation videos<br><i>Jessica Kunstler</i>  | 243 |
| Student teachers’ proofs and refutations on cyclic quadrilaterals<br><i>Magdalini Lada and Tore Alexander Forbregd</i>   | 251 |
| “I would (not) teach proof, because it is (not) relevant to exams”: changing beliefs about teaching proof<br><i>Gabriel Chun-Yeung Lee</i>                                   | 259 |
| Redesigning Proofs Without Words for secondary level mathematics<br><i>Nadav Marco, Alik Palatnik and Baruch B. Schwarz</i>  | 267 |
| What number makes sense? Standard word problems with nonstandard wording<br><i>Karolína Mottlová and Jana Slezáková</i>  | 275 |
| Proving as multimodal argumentation: an investigation based on Toulmin’s scheme<br><i>Andreas Moutsios-Rentzos</i>   | 283 |
| On the implementation of proving in primary school<br><i>Melanie Platz</i>   | 291 |
| ‘Reasoning’ in national curricula and standards<br><i>David A. Reid</i>  | 299 |
| Changing the significance of argumentation and proof in final secondary school examinations – a comparison between Hungary and Thuringia<br><i>Kinga Szűcs</i>               | 307 |
| Chinese teachers’ professional noticing of students’ reasoning in the context of Lakatos-style proving activity<br><i>Mei Yang, Andreas J. Stylianides and Mateja Jamnik</i> | 315 |

|   |     |
|---|-----|
| Introduction to the work of TWG 2: Arithmetic and number systems<br><i>Elisabeth Rathgeb-Schnierer, Renata Carvalho, Judy Sayers and Pernille Bødtker Sunde</i>                                       | 324 |
| How to map larger parts of the mathematics curriculum? The case of primary school arithmetic in Japan<br><i>Mayu Aoki and Carl Winsløw</i>  | 328 |
| Taking advantage of groupitizing skills to better understand numeration<br><i>Nathalie Bisailon</i>   | 336 |
| Strategies in numerosity estimation. Comparison of students with high and low accuracy<br><i>Leonie Brumm and Elisabeth Rathgeb-Schnierer</i>   | 344 |
| Didactic variables related to the use of manipulatives and their impact on students' activity: an illustrative case around fractions<br><i>Claudia Corriveau, Doris Jeannotte and Sandrine Michot</i> | 346 |
| Multiplicative comparison of fractions: potentials and limits of commensuration meaning<br><i>Lalina Coulange, Aurélien Ovide and Grégory Train</i>   | 354 |
| Investigation of Number Sense Strategies Used By 5th Grade Gifted Students in Turkey<br><i>Perihan Dinç Artut and Zübeyde Er</i>  | 362 |
| How is number sense assessed in the early years of mathematical learning?<br><i>Elvira Fernandez-Ahumada, Natividad Adamuz-Povedano, Enrique Martinez-Jimenez and Jesús Montejo-Gámez</i>             | 370 |
| Multiplication as a matter of Grundvorstellungen, strategies and representations<br><i>Marei Fetzer and Kerstin Tiedemann</i>   | 372 |
| Capturing flexibility in mental calculation<br><i>Timo Flückiger and Elisabeth Rathgeb-Schnierer</i>  | 380 |
| Open-ended tasks as approach for learning arithmetic in heterogeneous elementary classrooms<br><i>Silke Friedrich and Elisabeth Rathgeb-Schnierer</i>   | 382 |
| The Arithmetic Discourse Profile as a tool for evaluating students' discourse according to the ritual to explorative continuum<br><i>Einat Heyd-Metzuyanin, Avital Elbaum-Cohen and Michal Tabach</i> | 384 |

|  |     |
|--|-----|
| Counting strategies in a proficient grade 1 student: the case of Petra<br><i>Astrid Junker</i>   | 392 |
| MS-Math – A design research project to support university students’ fostering-competencies and primary school students’ learning with the focus on perceiving, understanding, and using patterns and structures<br><i>Laura Korten</i> | 400 |
| Categorization reliability of preservice elementary teachers’ use of mental computation addition strategies on natural numbers using a written questionnaire<br><i>Anders Månsson</i>  | 402 |
| Mental calculations with rational numbers: strategies’ range and strategy selection<br><i>Ioannis Papadopoulos and Michail Karakostas</i>  | 410 |
| Using Concept Cartoons to support the number line as a vehicle for mathematical understanding<br><i>Maria Pericleous</i>   | 418 |
| Strategy use in number line tasks: An exploratory eye-tracking study<br><i>Anna Lisa Simon, Benjamin Rott and Maïke Schindler</i>  | 426 |
| Teachers’ perspectives on number and addition in year one: application of FoNS framework in interview analyses<br><i>Pernille Bødtker Sunde and Judy Sayers</i>  | 434 |
| Informal strategies of students with autism spectrum disorder in solving Cartesian product problems<br><i>Steven Van Vaerenbergh, Irene Polo-Blanco, Lara González-de Cos and Juncal Goñi-Cervera</i>                                  | 442 |
| Make practice more productive – Introducing productive practice<br><i>Sze Man Yeung and Taro Fujita</i>  | 450 |
| Solving multiplicative structure problems with fractions in Primary School: Prior strategies to a teaching experiment<br><i>Cristina Zorrilla, Pedro Ivars, Ceneida Fernández and Salvador Llinares</i>                                | 452 |

|  |     |
|--|-----|
| Algebraic Thinking<br><i>Dave Hewitt, Maria Chimoni, Cecilia Kilhamn, Luis Radford and Jorunn Reinhardtson</i>   | 461 |
| Analysis of children's generalisations with a focus on patterns and with a focus on structures<br><i>Kathrin Akinwunmi and Anna Susanne Steinweg</i>   | 465 |
| Dealing with multiple unknowns and their relationship using the balance scales model at primary school age<br><i>Michelle Bräuer</i>   | 473 |
| Teaching algebraic thinking within early algebra – a literature review<br><i>Helena Eriksson</i>   | 481 |
| Powerful algebraic ideas: Early algebraic thinking and active citizenship<br><i>Jenny Fred, Paola Valero and Hendrik Van Steenbrugges</i>  | 489 |
| What is functional thinking? Theoretical considerations and first results of an international interview study<br><i>Kerstin Frey, Ute Sproesser and Michiel Veldhuis</i>   | 497 |
| Strategies exhibited by students with autism spectrum disorder and their typically-developing peers when solving a generalization task: an exploratory study<br><i>Juncal Goñi-Cervera, Irene Polo-Blanco, María C. Cañadas and Alicia Bruno</i> | 505 |
| A praxeological comparison of algebra content in vocational and academic preparatory programmes in Sweden<br><i>Matilda Hällback, Kajsa Bråting and Olov Viirman</i>   | 513 |
| Tinkering in algebra – the case of John<br><i>Cecilia Kilhamn</i>  | 521 |
| Students' ideas about variables as generalizers and unknowns: Design Research calling for more explicit comparisons of purposes<br><i>Stefan Korntreff and Susanne Prediger</i>  | 529 |
| Norwegian and Swedish student teachers' explanations of the solution of a linear equation: A qualitative approach<br><i>Niclas Larson</i>  | 538 |
| Relational thinking with indefinite quantities - case studies from elementary school children<br><i>Denise Lenz</i>  | 540 |

|  |     |
|--|-----|
| The “Sense-Making-Algebra” project for Hungarian seventh graders<br><i>Orsolya Dóra Lócska and Zoltán Kovács</i>   | 548 |
| Recognition of an equation as an algebraic description of contextualized situations by fifth grader<br><i>Esperanza López Centella, Jana Slezáková and Darina Jirotková</i>  | 556 |
| Proofs without words: focus on argumentation as a tool to investigate the link between visualization and generalization processes enacted by students<br><i>Lorenzo Mazza, Davide Passaro and Antonio Veredice</i> | 564 |
| The role of generalized arithmetic in the development of early algebraic thinking<br><i>Denetra Pitta-Pantazi, Constantinos Christou and Maria Chimoni</i>   | 572 |
| Grade 3 Students’ Algebraic Thinking Abilities: An empirically Validated Theoretical Framework<br><i>Marios Pittalis, Demetra Pitta-Pantazi and Constantinos Christou</i>  | 580 |
| Early algebra: Simplifying equations<br><i>Luis Radford</i>  | 588 |
| Calculational and analytical perspectives in introductory algebra: a theoretical contribution<br><i>Jorunn Reinhardtsen and Martin Carlsen</i>   | 596 |
| Using the bar model to ease the transition from transforming arithmetic-numerical to algebraic equations: theoretical considerations and possible obstacles<br><i>Anna-Katharina Roos and Leander Kempen</i>       | 604 |
| Using the graph when talking about functional relations in Grade 1: The importance of terminology<br><i>Helén Sterner</i>  | 612 |
| Conditions for revitalizing the elementary algebra curriculum<br><i>Heidi Strømshag and Yves Chevallard</i>  | 620 |
| Programming tasks as an instrument for helping students make meaning of methods for solving quadratic equations<br><i>David Taub</i>   | 628 |
| Diagnostic test tool based on a praxeological reference model to examine students’ technical and theoretical algebra knowledge<br><i>Pia Tonnesen</i>  | 630 |
| Primary school children’s justifications of equalities<br><i>Susannah Unteregge</i>  | 638 |

|   |     |
|---|-----|
| Students' intuitive conceptions regarding the concept of set<br><i>Ioannis Vlachos</i>  | 646 |
| Basic Mental Models of Equations – Theoretical Conception and Practical Meaning<br><i>Hans-Georg Weigand, Guido Pinkernell and Alexander Schüler-Meyer</i>  | 654 |
| Student definitions of equivalence: structural vs. operational conceptions, and extracted vs. stipulated definition construction<br><i>Claire Wladis; Ben Sencindiver; Kathleen Offenholley; Elisabeth Jaffe and Joshua Taton</i>         | 662 |
| A model of how students' definitions of substitution and equivalence may relate to their conceptualizations of algebraic transformation<br><i>Claire Wladis, Ben Sencindiver, Kathaleen Offenholley, Elisabeth Jaffe and Joshua Taton</i> | 670 |
| A dynamic early algebra approach for transitions from describing figures to transforming expressions<br><i>Alexandra Tondorf and Susanne Prediger</i>   | 679 |

|   |     |
|---|-----|
| Introduction to the papers of TWG04: geometry teaching and learning<br><i>Lina Brunheira, Michela Maschietto, Alik Palatnik and Chrysi Papadaki</i>   | 688 |
| Preservice primary teachers' curricular reasoning when anticipating primary students' answers to geometrical figure classification tasks<br><i>Melania Bernabeu, Mar Moreno and Salvador Llinares</i> | 696 |
| Investigation the Geometric Thinking of Nine Graders'<br><i>Veronika Bočková and Gabriela Pavlovičová</i>   | 704 |
| Embodied abstraction in geometry learning in grades 5 to 6<br><i>Karel Boonstra</i>   | 706 |
| Developing prospective primary teachers' knowledge of mathematical reasoning processes in the context of a geometry task<br><i>Lina Brunheira, Lurdes Serrazina and Margarida Rodrigues</i>           | 708 |
| Concept Formation of Geometrical Reflection in a Digital Learning Setting<br><i>Anna Edamus and Ralph Schwarzkopf</i>   | 716 |
| Classifying 3d figures by prospective primary teachers<br><i>Joaquín Giménez, Yuly Vanegas and Juan-Pablo Vargas</i>  | 724 |
| Impact of a geometry course on pre-service teachers' images of geometry through the lens of fundamental ideas<br><i>Theresa Häusler and Ana Kuzle</i>   | 732 |
| The teaching of geometry in primary education: Is geometry still neglected in school mathematics?<br><i>Ana Kuzle</i>   | 734 |
| Escape From Plato's Cave: An Enactivist Argument for Learning 3D Geometry by Constructing Tangible Models<br><i>Alik Palatnik and Dor Abrahamson</i>  | 742 |
| Developing tools to analyse secondary teachers' mathematical knowledge for teaching basic geometry<br><i>Iresha Ratnayake, Shikha Takker, Jill Adler and Craig Pournara</i>                           | 750 |
| Construction of an equilateral tringle in the plane and space: an analysis from the theory of semiotic mediation<br><i>Camilo Sua, Angel Gutiérrez and Adela Jaime</i>                                | 758 |

Secondary students' experience using 3D pen in spatial geometry: affective states while problem solving 766

*Dina Rosenski and Alik Palatnik*

## TWG11: Algorithmics 1890

- Introduction to the papers and posters of TWG11: Algorithmics 1891  
*Christof Weber, Janka Medova, Maryna Rafalska, Ulrich Kortenkamp, and Simon Modeste*
- The role of algorithmics in a Hungarian mathematics education program for gifted students 1895  
*Eszter Bóra and Katalin Gosztonyi*
- Students think algorithmically with differential equations 1898  
*Sharon Calor, Sonia Palha and Laura Kubbe*
- A digital artefact based on visual programming for the learning of axial symmetry in primary school 1900  
*Rosamaria Crisci, Umberto Dello Iacono and Eva Ferrara Dentice*
- Listing algorithms for combinatorics problems with variable parameter values: a case study 1909  
*Adaline De Chenne and Elise Lockwood*
- A practical experience in pre-service teacher education focusing on computational thinking 1918  
*Jeanne Dobgenski and Angélica da Fontoura Garcia Silva*
- Synergy of two division algorithms in 4th grade: opportunities and challenges 1921  
*Silvia Funghi and Alessandro Ramploud*
- Re-discovering sorting algorithms: the importance of cooperation 1929  
*Aaron Gaio*
- An exploratory study on mathematics teacher educators' beliefs and understandings about computational thinking 1932  
*Eirini Geraniou and Jeremy Hodgen*
- Algorithmics in Arithmetic: Revealing algorithmic activities in a first-year arithmetic course for preservice teachers 1941  
*Ulrich Kortenkamp*
- From written addition to written subtraction: A proposal to develop and understand algorithms through algorithmic thinking 1949  
*Markus Leifeld and Sebastian Rezat*
- Mathematical algorithms in civic contexts: mathematics education and algorithmic literacy 1951  
*Katja Lengnink and Stefan Pohlkamp*
- Exemplifying algorithmic thinking in mathematics education 1960  
*Elise Lockwood, Anna DeJarnette, Matt Thomas, and Knut Mørken*

- Graph problems as a means for accessing the abstraction skills 1969  
*Janka Medová, Gregor Milicic and Matthias Ludwig*
- An app-based learning environment for building algebraic competencies through algorithmic thinking 1978  
*Joscha Müller-Späth*
- Task design for promoting pupils' algorithmic thinking in problemsolving context without using computers 1981  
*Rafalska Maryna*
- Teachers' beliefs on computational thinking in school mathematics 1990  
*Martine Rekstad and Nils Henry Williams Rasmussen*
- Advantages and disadvantages of using loops in algorithms: conceptions of pre-service primary teachers learning Scratch 1992  
*Christof Weber*
- Developing algorithmic thinking without programming by designing instructions for encryption 2000  
*Carina Zindel*

- CERME 12 Thematic Working Group 12: History in Mathematics Education 2011  
*Renaud Chorlay; Tanja Hamann; Jenneke Krüger; Antonio Oller-Marcén*
- A suitcase full of logs – an experiment with the use of history of mathematics in teacher training 2015  
*Desiree Agterberg*
- The effect of a reading of Clairaut on prospective secondary mathematics teachers’ instructional design 2023  
*Alberto Arnal-Bailera, Pablo Beltrán-Pellicer and Antonio M. Oller-Marcén*
- Investigating the potential of a historical document for task-design 2032  
*Renaud Chorlay*
- The reception of modern mathematics in Belgian technical education: Adhering or resisting? 2041  
*Dirk De Bock*
- The “best” axiom system for teaching geometry to secondary school students: A source of controversy in the early 1960s 2050  
*Wendy Goemans and Dirk De Bock*
- Notabilia Arithmetica: a Jesuit mathematics school book 2059  
*Tanja Hamann and Barbara Schmidt-Thieme*
- Initiate reflection by original sources – Conception and empirical evaluation of a teaching project in calculus class 2086  
*Rosmarie Junker and Susanne Spies*
- Concurrence of two mathematics worlds in the Netherlands, 1600 and beyond 2077  
*Jenneke Krüger*
- ‘Maths knows no races or frontiers’: the history of mathematics for an antiracist education 2086  
*Erika Luciano and Elena Scalambro*
- Concepts introduced in Norwegian textbooks before, during and after the New Math period 2089  
*Hilde Opsal and Bjørn Smestad*
- Mathematic-historical example for university teaching of mathematics - how can methodical knowledge be taught as well as the culture of mathematics be made accessible? 2097  
*Nicola Oswald*

Exploring a property of mixed product in the middle school inspired by Bézout's use of units 2105  
*Andrea Surroca Ortiz and Christine Chambris*

Standing on the shoulders of Giants – looking at the teaching subject “conics” 2114  
*Ysette Weiss*

TWG22: Curricular resources and task design in mathematics education 3917

Introduction to the papers of TWG22: curricular resources and task design in mathematics education 3918

*Shai Olsher, Annalisa Cusi, Nataly Essonnier and Sebastian Rezat*

Prospective elementary teachers' selection of mathematical tasks 3926

*Cengiz Alacaci*

Influences of text design on problem solving processes and results in working-backwards problems

*Daniela Assmus and Frank Förster* 3934

Working backwards revisited- some theoretical considerations 3936

*Daniela Assmus and Torsten Fritzlär*

Teachers' characterizations of challenging introductory and enrichment tasks 3944

*Andreas Bergwall, Elisabet Mellroth, Torbjörn Jansson and Johan Nordin*

Reading comprehension and modelling problems: Does it matter where the question is placed?

*Valentin Böswald and Stanislaw Schukajlow* 3952

Characterizing the presence of activities using GeoGebra in Brazil's mathematics textbooks

*Ayla Carvalho and Rúbia Amaral-Schio* 3960

Engaging students as designers of digital curriculum resources: focus on their praxeologies and new awareness 3968

*Annalisa Cusi and Agnese Ilaria Telloni*

The role of dynamic elements in digital teaching platforms - an investigation of students' reading behavior 3976

*Anneli Dyrvold and Ida Bergvall*

Rethinking resource conceptualization in times of pandemic and earthquakes: What is important for (mathematical) educational? 3984

*Dubravka Glasnović Gracin*

Investigating curriculum resources and mathematics knowledge for teaching in teacher planning discussions 3992

*Marcus Gustafsson, Jorryt van Bommel and Yvonne Liljekvist*

Online feedback designed to support self-reflection while solving fraction example-eliciting tasks

*Amal Kadan-Tabaja1 and Michal Yerushalmy* 3994

TWG27: The Professional Practices, Preparation and Support of Mathematics Teacher Educators 4655

- Introduction to the papers of TWG27: The Professional Practices, Preparation and Support of Mathematics Teacher Educators 4656  
*Ronnie Karsenty, Stefan Zehetmeier, Hilda Borko, Bettina Rösken-Winter, Alf Coles, Birte Friedrich-Pöhler*
- Developing a disruptive pedagogy theoretical lens for studying the practices of mathematics teacher educators 4660  
*Annette Hessen Bjerke and Kathleen Nolan*
- Effects of Facilitator Professional Development on Teachers' Learning – An Intervention Study in the Context of Early Mathematics Education 4667  
*Julia Bruns, Maike Hagena and Hedwig Gasteiger*
- The role of the mathematics teacher educator in supporting engagement with global issues in the mathematics classroom 4676  
*Alf Coles*
- What makes doing mathematics in PD productive: Lifting and adapting a framework for insights on leader PD and facilitation 4684  
*Rebekah Elliott and Kristin Lesseig*
- The mathematics teacher educator as broker: boundary learning 4692  
*Elisabeta Eriksen and Yvette Solomon*
- Towards an approach to teachers' professional development: Creating learning opportunities for teachers who teach mathematics 4700  
*Miriam Criez Nóbrega Ferreira, Alessandro Ribeiro and João Pedro da Ponte*
- Facilitators' views on content goals, learning obstacles, and teaching resources in reference to conditional probability 4708  
*Birgit Griese, Ralf Nieszporek and Rolf Biehler*
- Facilitator practices during PD courses in response to teacher orientations for supporting at-risk students 4715  
*Christin Laschke, Victoria Shure, Birte Pöhler and Bettina Rösken-Winter*
- Developing personas to support professional practices of mathematics teacher educators 4724  
*Martin Mayerhofer, Michael Eichmair, Markus Hohenwarter, Zsolt Lavicza and Robert Weinhandl*
- Using a tool that assesses teachers' experiences of collaborative professional development to inform and improve facilitation 4726  
*Hannah Nieman, Kara Jackson, Michael Jarry-Shore, Hilda Borko, Elham Kazemi, Starlie Chinen, Anita Lenges, Zuhail Yimalz and Cara Haines*

The role of pedagogical modeling in being/becoming a culturally responsive mathematics teacher educator 4734
